I created this Squarespace website from the ground up, working closely with owner Janaea Barnard. She just had ideas of what she wanted. We found a theme, decided on a homepage design, I created custom headers for the web pages, edited and wrote copy, sourced and edited photos, etc.

I created and designed a custom FAQ, found a payment system (Bookeo) and implemented that with the site, designed page, etc. Also I created a sandwich board sign, and added input to the brochure.
